Swagga & Lace Year Four Progress Report Objectives

## **Introduction**

B.A.R.T. has been implemented with great success and some setbacks. The overall reflections of the first six months of Year Four had been a challenge with our Randolph County Site. This site was without a Program Manager/Lead Community Advisor and the office was maintained by the Program Director, Program Coordinator and Teen Advisors. This was a challenging task with regular duties and facilitating when needed. Continuous connection with teens and the community was challenging and handle with professional outreach to instill integrity and team spirit. There has been no change in our scope of Swagga and Lace Initiative.

During the month of September 2013 a position search for personnel in the Randolph County Site was underway. The selection was determined in October 2013.

B.A.R.T. continues to be well received with request to repeat the intervention by our previous graduates. We are now facing a momentum issue in Randolph County's recruitment. In this rural counties, our teens lacked recreational activities if you are not engaged in sports, we are not facing a promotional obstacle and marketing in Randolph County so our teens duplicated and unduplicated would continue enjoying Swagga & Lace.

Our greatest challenges as stated previously in the implementation of this program have been and continue to be sports, cheerleading, band activities (example drum-lines), weight practice and other extra-curricular activities. To address these issues we encourage teens, stakeholders and our site representative to recruit teens who are not active and often face high risk encounters.

## **Year Four Progress Report Narrative**

### **Description of any barriers encountered and how the barriers have been addressed during the reporting period**

Major barriers during the reporting period were:

1. The Randolph County Site staffing-During the last quarter of year three, the Program Director and Program Coordinator covered the site to continue working with B.A.R.T. graduates, Teen Advisors and continue recruitment strategies for year four. To address the coverage a rotating schedule was established for all activities. The search for staffing began in September 2013 and a selection was made in October.
2. This year's winter session was very harsh nationwide, and extremely difficult for the rural communities dealing with ice and road hazardous. We were unable to keep our offices warm due to the extreme cold; we work around the temperature and ice by coming in later with extended hours.

3. Sports, band, drum lines, weight training, cheerleading is the number one challenges and barriers we encounter. The “*Friday Night Lights*” emotions run really deep to have a winning season and are year round. We encourage our partners to recruit teens who are not actively involve, but rural community schools encourage teens to be involve, and some are bused to another county which presents a transportation issue. Some after school activities do not start until 7 PM and the B.A.R.T. sessions are in full progress.
4. B.A.R.T. Facilitators-We have trained over 30 B.A.R.T. Facilitators since year one of the program. Due to work schedules, sport schedules, sometime transportation issues to other counties, lack of interest; our prevention team members have focused on implementing B.A.R.T. To address the transportation issues the BOD purchased additional vehicles with other funding to transport staff and teens if needed. (This reporting period two or three implementation sites occurred simultaneously)
5. Our Randolph County Swagga and Lace momentum has diminish since the start of the program. We have great concerns as we entire year five. Now that staffing at the site is complete, we are very displeased with our outcome. The Project Coordinator has been very active encouraging and assisting our Site Manager, attending community meetings; especially with the Randolph County Family Connection- networking and undertaking recruiting. As we enter into year five a decision will be make on the longevity and survivorship of the program within the county.

#### *Messages for recruitment Training*

A correction was made to assist in recruiting; the message during promoting the program by one of the Program Managers was “You know you need to come”. This was totally inappropriate for recruiting. This was our instruction to use- “Join us! You will learn communication styles, HIV/AIDS/STD information, you get to showcase you talent as we role-play”. We have stress the program promotions show be exciting, once in a moment and a program you do not want to miss.

#### **Description of efforts to monitor fidelity of the program at all sites during the reporting period**

B.A.R.T. sessions were scheduled with B.A.R.T. Facilitators and B.A.R.T. Observers by assignments by the Program Coordinator and the Program Assistant. (Approved by the Program Director) A minimum of 10% observations has been completed as required by OAH for Year Four. The observation data was submitted to the Program Coordinator for review and approval then submitted to the Data Collection Specialist for entry into the National Evaluation Data Base.

**Description of the number of sessions completed and number of youth served**

The chart below indicated our progress during Year Four's reporting period ending August 30, 2014:

**BART SESSIONS  
GRADUATES AND TEENS REACHED  
SEPTEMBER 2013 - AUGUST 2014**

<b>SITES</b>	<b>DATES</b>	<b># TEENS REACHED</b>	<b># OF GRADUATES</b>
Friendship Cohort 10	9/4/2013 - 10/30/2013	18	15
Friendship Cohort 11	9/4/2013 - 10/30/2013	16	12

<b>TOTALS</b>		<b>194</b>	<b>155</b>
<b>GOAL FOR 2013-2014</b>			<b>150</b>
<b>GOAL MET +</b>			<b>5</b>

**Description of recruitment and retention efforts of program participants with discussion of successes, challenges/barriers; and how these challenges/barriers were addressed**

Our methods of recruitments are

- Partners
- Previous B.A.R.T. Graduates
- Community events and exhibits
- Georgia Department of Family and Children Services
- Department of Juvenile Justice
- Board of Directors, B.A.R.T. Facilitators, agency's consumers and staff recruitment
- Community Stakeholders

Prior to each cohort a parent orientation is held to introduce the prevention team, B.A.R.T. curriculum, schedule date and time of sessions and provide a question and answer moment. Challenges we continued to encounter were failure to meet the required number of participants for a cohort to address the issues we increase the number to participants to be recruited from 15 to 20 to ensure an average of 10-14 attendees for all eight sessions in B.A.R.T. To ensure retention after a participant has missed a session we notify the partner representative to contact the parents.

**Activities to ensure all materials are medically accurate**

The only materials utilized were prior approved for medical accuracy during year one.

**Description of activities to market the program**

Our marketing strategies include participating in community exhibits, branding our graduates' items, and distributing Swagga and Lace Initiative brand items. During the last quarter of year four's reporting period we discussed a plan to include a professional marketing strategy for rural teens in our sustainability efforts. This marketing tool will include teens as our primary composers for this proposal and outreach materials.

*Swagga and Lace Exhibit*  
Columbus Chamber of  
Commerce  
March 2014

**Descriptions of activities to build, enhance, and retain partnerships to support the program**

Retaining partnerships to build and enhance the support of the program has been a challenge due to the main focus has been to reach high risk teens. The efforts to retain these partnerships for support are within our sustainability plan to reach additional youth of elementary age.

Bi-monthly sessions are held to emphasize the following Kwanza Principles discussed in BART Session 1:

Understanding HIV & AIDS	Activities 2 and 3	
	Creativity and Unity	Team Building/Poster Creation
Making Sexual Decisions & Understanding your Values	Activities 1 and 2	
	Self-Determination and Faith	Panelist Night ( <i>Volunteers</i> ) Speakers from Rape Crisis Center, Law Enforcement, fitness centers, nutritionist, clergy
Personalizing the Risks	Activities 1 and 2	
	Collective Work and Responsibility Cooperative Economics	Panelist Night ( <i>Volunteers</i> ) Speakers from healthcare, military, business field, auto mechanic.
Spreading the Word	Activities 1 and 2	
	Purpose	Goal Settings! Willie Robinson

**Description of training and professional development opportunities for partners and/or facilitators and dissemination efforts about the program through presentations or publications**

The Program Director searches, selects trainings and development opportunities within the budget, therefore abstracts are submitted to achieve both.

Our Level One Team Member includes:

- a. Program Director
- b. Program Assistant
- c. Program Coordinator
- d. Marion County Lead Community Advisor/Site Program Manager
- e. Randolph County Lead Community Advisor/Site Program Manager who came on board October 2013, this was the only staff changes for Year Four.

To assist in our sustainability efforts staff attended training to gain skills in achieving successful grants. Two trainings were attended by staff on “Grant Writing Success”. From these training we have determined our lack of skills in foundation searching and grant writing for foundations.

### **Description of activities implemented to monitor implementation partners and/or contractors**

The processes of monitoring the activities of implementation are conducted by the Level One Team Member as describe above. Monthly Agency Success meeting are held to ensure the activities, sessions and implementations are within a professional manner as well as implemented with fidelity. In addition, we conducted strategic agency success meetings with our facilitators and contractors during the month of June and August 2014. The agenda included:

- a) 2013-2014 Swagga and Lace Review
- b) 2014-2015 Swagga and Lace (OAH Expectations)
- c) Expected Graduates for year five =210
- d) Sustainability Efforts
- e) Program Investment
- f) Updated Resumes

Often, we continue to stress the vital importance of the session’s implementation, retention, and the national evaluation data which will meet OAH goals and showcase our contributions.

### **Progress on evaluation activities, including participation in the Federal evaluation**

The progress of the Federal Evaluation has been completed with all data entered for Year Four.

*Swagga & Lace in  
Action*

### **Description of activities focused on program sustainability**

This first reporting period the prevention team has participated in training to enhance our skills to increase our performance and scoring on future submitted applications. The challenges of completing B.A.R.T. sessions while facilitating B.A.R.T. and performing their duties and responsibilities was very timely for the prevention team during this time. Following our completion of implementation grant seeking and grant writing for federal application occurred during June through August 2014 by Ms. Rhodes, Mr. Mike and Ms. Leonard.

### **Describe progress on developing and implementing a long-term strategy to plan for sustainability.**

We have made the decision to select specific or the most needed programs from the list below. It is our goal to provide diverse services for healthier adolescents.

The critical need to continue improving the health and well-being of rural adolescents in West Central Georgia is a continuous concern for our prevention team which often results in panic. Through the present implementation of B.A.R.T. the following teen issues we would like to address.

- ✓ Substance Abuse (Adolescent and their families)
- ✓ Homelessness
- ✓ Literacy
- ✓ Teen Pregnancy
- ✓ Family Planning
- ✓ Male Involvement
- ✓ Fatherless and Motherless Homes
- ✓ Academic Challenges
- ✓ Life Skills
- ✓ Goal Setting
- ✓ Bullying and Violence
- ✓ Healthy Relationships
- ✓ Money Matters (Financial Literacy)
- ✓ Abandonment
- ✓ Public Speaking with Confidence

The sustainability plan determined by the Board of Directors and our Lead Community Advisors (Site Managers) is a continuous discussion during board meetings, grant monitoring conference calls and our agency success meetings. We desire to maintain a committed and dedicated staff and increase our partner pool for long term sustainability and community buy-in.

## A. Action Strategy

Goals	Activities	Outputs	Outcomes
1) Improve the quality of life among rural teens	Staff training and development	Application Submissions	Successful sustainability
	Funding research	Marketing and Promotions	↑Parenting Engagement
2) Increase Partner Pool	Program marketing training or secure consultant	Parent Involvement	↑Partnerships
3) Provide program training for partners	Parent engagement training	#Parents served	↓Teens Risky Behaviors
4) Diverse staff training		Partners Programs	↓Teen Pregnancy
		Teen Program Implementation	↓STDs Reported
5) Develop Program marketing plan		# Teens served	↑Academic performance

## B. The Environment Assessment

What are our community's needs with respect to improving adolescent health? ➡	How do our programs/services meet those needs? ➡	What evidence or data do we have that supports our current service delivery system? ➡	Do our programs or services overlap with other community providers? ➡	What is unique about our programs or services or service delivery system?
<ul style="list-style-type: none"> <li>Prevention Education</li> <li>Empowerment Skills</li> <li>Listening Skills</li> <li>Employment Preparation</li> </ul>	BART meets the teen pregnancy, HIV/STD Prevention needs	The evidence of support is our current BART Program	No overlap in rural community providers	The uniqueness of our programs is providing services over a 60 miles geographic area.

### C. Adaptability

As we continue into our sustainability efforts our goals and objectives are to:

- 1) Serve our present teens with unduplicated programs
- 2) Engage a minimum of 50% of our participants' parents in programing and participation.
- 3) Provide partner training to produce success programs and grant writing skills
- 4) Establish a strong committed coalition of agencies willing to working together without feeling intimidated.
- 5) To become competent in conveying our ability to implement evidence based program that are urban researched but can be adapted for rural youth by our team.

### D. Community Support

A major lesson learned is a need for messages targeting rural communities for successful recruitment and support. We fully understand that the messages as well as the messagers are very important. Presently we conduct partners meetings and encourage partners support.

We will now attempt to recruit additional teen advisors to assist in marketing and promotions. This process for us will be from the ground up.

### E. Integrating Programs and Services into Local Infrastructures

Integrating programs and services into local rural infrastructures has been our goal. . In our rural communities aligning our core services are challenging. Our present partners and 2<sup>nd</sup> Congressional District Congressman Sanford Bishop Field Representative has encouraged rural counties Family Connection Agencies to integrate our program.

**Cusseta-Chattahoochee Family Connection**  
*"Family Day"*

## F. Leadership Team

Our current leadership team includes our present staff and Board of Directors. We are striving to diverse our leadership team to gain the force of a stronger youth servicing rural coalition. Due to our geographical areas it is important to have committed members. Our goal to embrace a powerful coalition with 4 additional rural members by December 1, 2014 is in process as of this date.

Who can articulate our mission, vision and goals to potential funders, external collaborators, civic leaders and community member?	Who can manage our day-to-day operations, including managing budgets and staff resources?	Who has a strong knowledge of our work, the research and data supporting the approach and how the program meets the community's needs?	Are leaders of our larger organization knowledgeable in and promoting our programs or services
Michael Ellison Luella Rhodes Sheila Leonard Britney James	Luella Rhodes Sheila Leonard Michael Ellison	Luella Rhodes Shelia Leonard Michael Ellison Gwen Askew	NO

Who are our current external champions and what aspects of our program do they promote to the community?	Are there areas of our work that are not being adequately promoted to the community?	Can we draw upon some of our current external relationships to identify individuals who can champion our work that is not being adequately promoted to the community?	Do we have a diverse pool of Community champions?
Presently1	Yes, BART graduates and their experience	At this time, no.	NO

### **G. Strategic partnerships**

Our present types of partners include faith based organizations and community stakeholders. Our community stakeholder in Marion County is very vigilant in recruiting. His connection with the community recreation center has been a great asset.

Our past and present community partners are:

Bread of Life

Breath of Life

Randolph County Office

Marion County Office

Nazareth Baptist

Empowerment Ministries Intl'

Rose Hill Baptist

Antioch Baptist

Gaines Chapel

Nichols Chapel

Friendship Baptist

Shady Grove

World Changes

Embassies of Deliverance

Cussetta-Chattahoochee Family Connection

***Swagga and Lace Male Symposium***  
Yes, we are Working Together!

## H. Diverse Financial Opportunities Securement

Diversity in funding is truly what we are lacking; it is our goal to improve within this element for long-term sustainability.

Impact investing, social enterprise and business models is of interest to our agency. The determination of what is best and beneficial as a long-term alternative will be explored.

### Describe how stainability planning has been integrated into your regular work activities.

During our agency success meeting sustainability planning is address with updates from OAH and other funding sources, the chart below exhibits our dedication to sustaining programing for rural adolescents.

<b>Key Accomplishments, Successes and Proud Memories</b>		
<b>Activity:</b>	<b>Date</b>	<b>Narrative</b>
<b><i>Mother &amp; Daughter Brunch "We Are One"</i></b>	May 17, 2014	The Mother & Daughter Brunch "We Are One" was held at the Girls Inc. in Columbus, Georgia with 11 mother and daughter couples. With a total of 31 individuals in attendance ages ranging from 9 years old to 58 years old. This event was in observance of National Women Health Week where a wealth of health information was exchanged starting with Hygiene 101 for the younger attendees. The dialogue was dynamic with the older generation given wisdom and advice to the younger generation. It was a fun and educational atmosphere with door prizes given out throughout the event.
<b><i>Girl's Roundtable: Sexual Assault Workshop</i></b>	June 26, 2014	The "Girls Roundtable" Sexual Assault Workshop was held at the Marion County site. There were a total of 13 teen girls in attendance. The speaker covered a lot of information, including the new state laws as it pertains to teens engaging in sexual activities to also giving the young ladies information on what to do and who to call if they ever found themselves in an abusive situation. The young ladies all said that the session was very "real" and informative. One of the young ladies even mentioned, "how eye opening some of the information was." Afterwards, the participants enjoyed pizza and dessert. They had so much fun, that they didn't leave the site until 2 hours after the session was over.
<b><i>National Men's Health Month Observance</i></b> "Keeping It Safe and Secure! Mind! Body! & Spirit!" Male Symposium	June 27, 2014	In observance of the National Men's Health Month, Swagga & Lace presented " <b><i>Keeping It Safe and Secure! Mind! Body! &amp; Spirit!</i></b> " Male Symposium held in Clay County. There were a total of 16 male teens from Muscogee, Randolph, and Clay Counties. We were excited to bring males of greatness together to share a wealth of information with our participants. We understood that in challenging times of today, young males are not always encouraged and celebrated for their talent, intellect, resilience and strength often. So, they were engaged and surrounded by their future. We selected males who possess great knowledge and who

		<p>have made contributions to their families, communities and society. We had four speakers who shared information about entrepreneurship, life story about behaviors and results, educational motivation for middle and high school and college life and sharing of feelings in a group discussion. They all enjoyed all of the presentations. A common theme from the discussion was about homes without a father presence. They shared feelings about their father not being in their lives. But what was most interesting was how they felt about their father having other children who knew about them but they did not know about the father's other children. Some expressed anger and their dismay about how the other children were living compared to them. As we continued to talk about fathers, a thought provoking question was asked by a 17 year old; "How do you be a good father?" Think about some possible answers.</p>

### Real Care Babies Adaptation Narrative

During our six month reporting period we shared our success story that each of the participants elective to receive the Real Care Infant Simulator has received a score less than forty percent (40%). This is considered a success for it provides documentation of the care and responsibilities. Many could not remember to return the babies bottles or the diapers. A challenge we experience is the females are eager and in line receive an infants.

We continued the requirement for the teens to care for the infant from Thursday to Monday to gain a weekend experience. Will they neglect the infant to go out or continue to sleep? Yes, they did! A participant was so over whelm she requested the infant be pick-up with-in 24 hours after receiving it. She received praise for her decision to recognize that she was incapable of the responsibility. We discussed the risk of child abuse, neglect and/or shaken baby syndrome often seen with teen parents.

Real Care Fathers sharing their experiences!

Of course, the young men above and all the participants' shared they are willing to delay having children until they are older and more mature.

## RealCare® Baby Simulation Report

**BABY9F25 Date Programmed: 10/2/2013 8:36 PM**

### Clothing and Temperature

Baby detects temperature, clothing, and length of time in car seat/carrier to address flathead syndrome. Missing clothing only appears if Baby detects no clothing during a significant period of time.

Look for spikes in temperature on the graph below to determine mishandling. Baby's temperature should fall inside the comfort range (in green – mid section of report). If Baby's temperature falls above or below the comfort range, Baby has been exposed to extreme temperatures for an extended period of time.

	Day 1	Day 2	Day 3	Day 4
High Temp	108 (9:24 PM)	86 (12:27 AM)	83 (11:20 PM)	91 (1:03 PM)
Low Temp	88 (12:14 AM)	73 (10:20 AM)	75 (11:10 AM)	77 (6:23 AM)
Time out of safe temp range	2.8 hours	6.1 hours	2.2 hours	9.1 hours
Max time between change of clothes	0.5 hours	11.2 hours	10.4 hours	3.0 hours
Time in car seat/carrier	1.0 hour	14.0 hours	12.0 hours	7.0 hours
Simulation Time	3.0 hours	24.0 hours	24.0 hours	19.8 hours

# RealCare® Baby Simulation Report

**BABY1E0C Date Programmed: 2/6/2014 8:11 PM**

## Clothing and Temperature

Baby detects temperature, clothing, and length of time in car seat/carrier to address flathead syndrome. Missing clothing only appears if Baby detects no clothing during a significant period of time.

Look for spikes in temperature on the graph below to determine mishandling. Baby's temperature should fall inside the comfort range (in green – mid section of report). If Baby's temperature falls above or below the comfort range, Baby has been exposed to extreme temperatures for an extended period of time.

	Day 1	Day 2	Day 3	Day 4	Day 5
High Temp	77 (11:50 PM)	86 (7:51 PM)	88 (6:05 PM)	89 (8:30 PM)	86 (4:19 AM)
Low Temp	59 (8:00 PM)	75 (2:59 PM)	81 (8:03 PM)	83 (4:28 AM)	77 (4:19 PM)
Time out of safe temp range	0.9 hours	0.7 hours	19.5 hours	19.4 hours	2.6 hours
Max time between change of clothes	0.3 hours	17.1 hours	4.1 hours	4.3 hours	17.3 hours
Time in car seat/carrier	0.3 hours	0.2 hours	0.0 hours	0.0 hours	0.0 hours
Simulation Time	4.0 hours	24.0 hours	24.0 hours	24.0 hours	16.8 hours
